**Access a groundbreaking, comprehensive interactive map and timeline of Hezbollah's global terrorist activity from the group's founding through 2020.**

**H**ezbollah is a global organization engaged in overt social and political activities in Lebanon, military activities throughout the Middle East, and covert militant, criminal, and terrorist activities around the world. While highly public about its social and political work, the group goes to great lengths to conceal its illicit pursuits. As a result, no single repository of the collected, open-source information about Hezbollah's worldwide activities is yet available. This deficit has hindered the emergence of a fully informed public debate on the totality of Hezbollah's activities.

The Lebanese Hezbollah Select Worldwide Activity Interactive Map aims to fill this knowledge gap. A multimedia tool, the map is searchable by numerous modes, and includes photographs, videos, event summaries, linkages among entries, and primary-source documents. This project—easily the most ambitious and comprehensive of its kind—illuminates the full range of Hezbollah's activities, from travel routes and aliases to larger themes related to the organization's founding, development, and relationship with key state sponsors.
