## **Dennis Ross.**

From Gaza to Baghdad, recent headlines have only underscored the fact that the Middle East can be a nightmare for the policy planner. As periodic tensions in relations between Washington and Israel show, events in the region can even test the closest of alliances.

The late Samuel W. Lewis -- who played a key role as architect of the U.S.-Israel relationship when he served as ambassador to Israel in the Camp David era, and then helped the Clinton administration navigate the uncertain waters of the Oslo era as head of State Department Policy Planning -- understood not just the difficulties of America's relationship with the Middle East, but how Washington could still advance peace and security despite them.

To celebrate his life and accomplishments, The Washington Institute convened a special half-day symposium just before his birthday (October 1) on the themes most closely associated with his public service -- themes whose timeliness and relevance have only grown over the years. This event is supported by the Irwin Levy Family Program on the U.S.-Israel Strategic Relationship.
